

Miranda, David Nathaniel Usman

Philippines | (+63) 997 563 3329 | davidmiranda.gamedev@gmail.com | [LinkedIn](#) | [GitHub](#)

Professional Summary:

Bachelor of Science in Information Technology graduate specializing in Game Development, with hands-on experience developing educational games, multiplayer prototypes, business applications, and database-driven systems. Skilled in Unity, C#, Python, MySQL, and UI/UX design, with experience building complete software solutions from concept to deployment. Passionate about creating engaging interactive experiences, scalable systems, and user-focused applications.

EDUCATION

University of Perpetual Help System Laguna

Biñan, Laguna

Bachelor of Science in Information Technology Specialization in Game Development

2022 – 2026

PROJECTS

Faith In Focus: A Bible Game Application (Unity, C#)

[GitHub Repository](#) | [Gameplay Demo](#)

- Developed an interactive educational Bible game for children (ages 6–12)
- Implemented a story-driven system with choices and multiple endings
- Designed a quiz and reward system (stars, achievements, progression)
- Built a chapter-based gameplay structure with unlockable content

Bible Quiz Adventure (Unity, C#)

[GitHub Repository](#)

- Developed a mobile Bible quiz game featuring Adventure Mode, Endless Mode, level progression, and achievement systems.
- Designed a reusable quiz architecture using a single gameplay scene and data-driven level structure.
- Implemented save systems, progression tracking, star-based rewards, and scalable question management.
- Optimized UI and gameplay systems for Android devices using Unity.

Dungeon Coop Quest (Unity, C#, Networking)

[GitHub Repository](#) | [Gameplay Demo](#)

- Developed a multiplayer dungeon crawler prototype using Photon Networking.
- Implemented room creation, player synchronization, and real-time multiplayer communication.
- Built lobby systems, networked player spawning, and multiplayer session management.
- Gained hands-on experience with RPC communication and multiplayer architecture design.

Inventory Management System for Water Refilling Station

- Built a system to manage inventory, sales, and reports
- Implemented automated tracking for daily, weekly, monthly sales
- Designed database structure using MySQL
- Improved business decision-making through data insights

WORK EXPERIENCE

ALTA Realty Corp. – Real Estate Company (Intern)

Biñan, Laguna

Technical Support & Digital Media Intern

August 2025 – December 2025

- Developed and maintained the company website to improve online presence and digital engagement.
- Designed marketing materials, promotional graphics, and social media content using Canva and other design tools.
- Provided technical support, including hardware troubleshooting, system setup, software installation, and workstation configuration.
- Managed data encoding, record organization, and administrative digital documentation.
- Collaborated with team members to support business operations through technology and digital solutions.

Aqua Deo Water Refilling Station

Sta Rosa, Laguna

Database Administrator & System Developer

May 2024 - December 2024

- Developed and deployed an Inventory Management System using Python and MySQL to support daily business operations.
- Managed and maintained inventory records, customer information, and sales data within the database system.
- Implemented automated reporting for daily, weekly, monthly, and yearly sales tracking.
- Improved operational efficiency through data organization, inventory monitoring, and process automation.
- Ensured data accuracy, consistency, and secure storage of business records.

TECHNICAL SKILLS

- Languages: C#, Python, JavaScript, SQL
- Game Development: Unity, Photon PUN, TextMeshPro, PlayerPrefs
- Web Technologies: HTML, CSS, JavaScript, PHP
- Databases: MySQL
- Tools: Git, GitHub, Visual Studio, Canva, Photoshop, Blender
- Concepts: Object-Oriented Programming, UI/UX Design, Multiplayer Networking, Database Design, System Architecture
